

EMPOWERING VETERANS TO REGAIN CONTROL OF THEIR LIVES

MISSION

During the development of our programme, 40 UK veterans have died by suicide.

Source: National Institute of Health

At VTRN RESET CIC, we empower service leavers and veterans who are suffering from mental health crisis, transition-related issues, and lack of vision to reclaim their lives and self-actualise. We achieve this through our Joint Service Partnership Model, which at its core is an intensive 10-day retreat designed by a global team of experts in psychotherapy, neuroscience, mindfulness, relaxation techniques, nutritional science, and physical and somatic therapy. Veterans' transformative journey is supported by a clear vision and ongoing personal development plan, ensuring their brighter, more fulfilling future.

STATISTICS

1 in 10

serving armed forces were seen in military healthcare for mental health reasons.

Ministry of Defence, UK Armed Forces Mental Health Report 2021

In 2015/16, 3.2% of UK armed forces personnel were assessed with a mental health disorder – over 6,000 people. Many more go undiagnosed and untreated.

MHFA England

186,000

UK veterans suffer from PTSD = 7% of all UK veterans.

Dr Walter Busuttil, Medical Director at Combat Stress 92%

of veterans combat stress treat have 2 or more mental health issues (PTSD & Transitional) of which 80% have served in combat roles.

Dr Walter Busuttil, Medical Director at Combat Stress

In the last decade the number of veterans seeking help, particularly those who have served in Afghanistan and Iraq, has increased 97% with more that 2000 new veterans seeking help each year.

Combat Stress

The percentage of British Army service personnel who have been medically discharged for mental and behavioural disorders has increased some **318%** in a decade.

OUR VISION & GROWTH STRATEGY

2024

Remit to go out to the 4 nations per capita

VTRN RESET in engaged with candidate identification partners across England, Wales, Scotland and Northern Ireland, to ensure the programme is accessible to Veterans and Service leavers in need from all 4 nations.

2025+

Scale Annually to meet demand

By Year 3 there will be 360 candidates per year coming through the programme. The longer-term plan is to accommodate 600 candidates annually by Year 5 and 1,200 candidates by Year 10.

2026

Become a direct service delivery partner for the NHS

Expansion to blue light services

Ukrainian NGO partnership post conflict

The goal is to become a delivery partner for the NHS in direct support of Op Courage. This approach will be backed by published reports through Kings College London, Regents University London and The University of Cambridge.

The programme scope will be expanded to the Blue Light Service Veterans and then to all frontline services. The Blue Light services report a staggering 87% are suffering from poor mental health at work. Access to mental health support is available but is more problematic once they retire from service.

We are partnering with Ukrainian NGOs to help with their post-war recovery programme. Fujitsu are supporting in the development of the app, website and processes in the Ukrainian language.

PACKAGES
